

TEAKWAY SERVER RACK SERIES

Description

The 42U – 25U server cabinets have capacity and quality --everything it takes to get the job done right for your high-density applications that rack and store a range of 19-inch equipment like servers, patch panels, PDUs, routers, and more. The cabinets define heavy duty - the 42U model holds a static load of 3000 lbs (stationary).

The cabinets come pre-assembled for easy setup and include pre-installed heavy-duty locking casters for mobility, and levelling feet for use when the fully racked cabinet needs to stay in place
